PART. THREE

DECORATIVE WIRE MESH

Metal decorative mesh is a mesh structure made of stainless steel, aluminum alloy or iron art. It has both artistic beauty and functionality. It is often used in building curtain walls, interior design and landscape decoration to create a transparent and modern spatial visual effect.

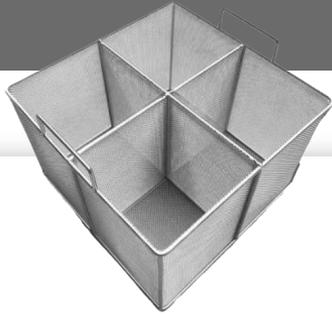

PART. FOUR

Wire Mesh Deep Processing Products

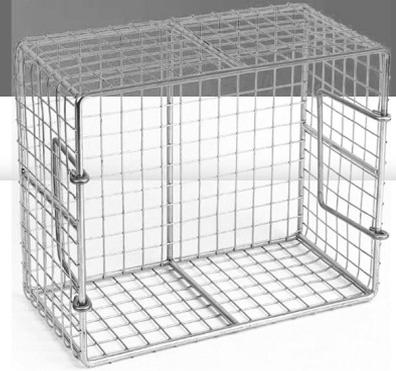

Wire mesh deep-processing products are made of metal wire mesh (such as stainless steel plate, iron wire, copper wire, etc.) as the base material, and are deeply processed through stamping, welding, weaving and other processes. They have the characteristics of high strength and wear resistance, and various shapes. They are suitable for customized needs in industrial screening, architectural decoration, household goods and other fields.

Tube

PART. FIVE

Warehousing and transportation product

Warehousing and transportation products are made of metal materials and achieve efficient storage and cargo handling through scientific structural design. They have the characteristics of strong load-bearing capacity, wear resistance, and modularity. They are widely used in warehouses, logistics centers, and production lines to optimize space utilization and improve logistics turnover efficiency.
